

*Carolina Silva*

Recipient of

Avery R. Burton "Excellence in Academics and Sports" Memorial Scholarship

I would like to express my sincerest gratitude for granting me this scholarship. Because of your generosity, I now can gladly say I have enough funding to not have to burden my parents with my education. Everything I will need is paid for, and I can live with peace of mind!

I am extremely grateful for the fact that I have been granted this scholarship. I plan to major in Biology, on a pre-med track to eventually become a surgeon. This entails a four year undergraduate degree, another four years at a medical school, and then 8-10 years of residency, with possibly a fellowship that could add a few more years. With that being said, this is an arduous and expensive process. However, with help from supporters like you, each step is becoming less burdensome and more possible!

Again, thank you so much, as your support is making a difference in my education, my career, and my life. Please continue to support students, as this has been a true blessing!

Also, please don't ever forget that Jesus loves you!!

*Thank You!*
